

HIGH SPEED RURAL LIMITED ACCESS FREEWAY TYPICAL SECTION

70 mph Design Speed

This roadway type would have a 70 mph speed limit within 354 feet of right-of-way. Direct cross road and driveway connections ARE NOT allowed with this type of roadway, except at the beginning and end of the roadway at US 98 and SR 79, where the limited access designation will end. This facility type is similar to Interstate 10 or the Suncoast Parkway, which are also limited access roadways. Only this type of roadway can accommodate tolling, if determined feasible by FDOT. Bicycles and pedestrians are not allowed within the Limited Access facilities; therefore, a multi-use trail in a separate 30-foot right-of-way along the outside of the limited access fence is provided.
